

Create a Freeform Button

1

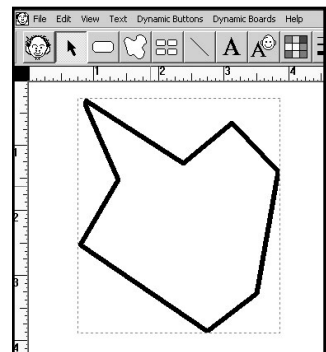

- Select the **Freeform Button Tool**.
- Click and drag out the shape of the freeform button. As you drag the mouse, you will see the button border appear.
- Release the mouse button to automatically close off the button border.

Create a Freeform Button with Straight Edges

2

- Select the **Freeform Button Tool**.
- Press and hold the **Control** key on your keyboard.
- While continuing to hold down the **Control** key, click the mouse where you want each corner of the polygon to be.
- To finish your polygon freeform button, double-click to specify the position of the final corner (or release the Control key).

Combining Straight and Curved Edges

If you are creating a curvy freeform button and want to transition to straight edges:

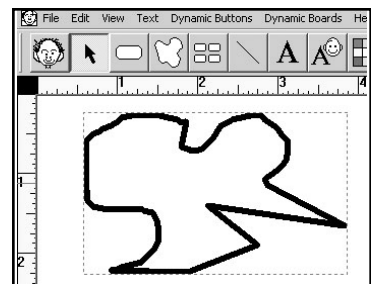

- While still holding down the mouse button, press and hold the **Control** key on your keyboard.

- Continuing to hold the **Control** key, release the mouse button.

- Click the mouse where you want the corners to appear.

To transition from straight to curved edges:

- While still holding down the **Control** key, click and hold down the mouse button.
- Continuing to hold down the mouse button, release the **Control** key.
- Click and drag out the shape of the curved portion of this button.
